EDUCATION

- Vellore Institute Of Technology University**
Bachelors of Technology in Computer Science Engineering (Cybersecurity Specialization)
CGPA: **8.33**/10

India

Sept 2021 - June 2025

WORK RELATED EXPERIENCE

- InLighntech Global Pvt. Ltd.**
Offensive Cyber Security Intern

June 2025 – Present

Remote

- Engaging in real-time penetration testing and vulnerability analysis to report security flaws in simulated environments.
 - Assisting in threat modeling and attack surface analysis to strengthen defensive strategies and reduce risk exposure.
 - Participating in red team simulations to improve threat detection, incident response capabilities, and SOC preparedness.
- Shadownik (Swnk)**
Freelance

June 2024 – Present

Remote

- Established web development services , Cybersecurity Services , Community Non profit Project and Led a team to deliver secure development, achieving a client retention rate by implementing security strategies.
 - Launched secure hosting services for 3+ clients, reducing vulnerabilities through robust security and penetration testing.
 - Working on future venture of SSP a Social Media management and marketing automation project
 - Link:** swnk.in
- Ethical Hacking Intern, Internship Studio**
Cybersecurity Internship

India

- Identified Cross-Site Scripting (XSS) vulnerabilities in web applications, reducing attack surface through ethical exploitation and secure coding practices.
 - Authored detailed vulnerability reports, reducing remediation time by providing actionable mitigation strategies.
 - Designed and implemented advanced cybersecurity lab environments, simulating real-world threats to upskill 12 team members, enhancing practical expertise.

PROJECTS

- Offensive Scanner: Security Testing Tool**
Lead Developer

March 2025 - Present

- Engineered a Java-based security scanner, detecting vulnerabilities across networks by implementing multithreaded port scanning and reconnaissance modules.
 - Enabled ethical hackers to identify critical vulnerabilities per scan, improving network security assessments through automated testing.
 - Designed a modular architecture, reducing scan time via optimized threading and YAML-based configurations.
 - Tech Stack:** Java, Maven, YAML, Multithreading, CLI
 - GitHub:** github.com/5h4d0wn1k/offensive-scanner
- Open-Source SIEM Platform**
Lead Developer and Architect

October 2024 - January 2025

- Developed a scalable SIEM platform, improving threat detection by integrating Python-based log correlation and machine learning algorithms.
 - Reduced false positives through optimized threat detection algorithms and real-time log analysis.
 - Created a Next.js frontend with dynamic threat visualization, enhancing user interaction and enabling faster incident response.
 - Tech Stack:** Python, Next.js, Machine Learning, Threat Detection
 - GitHub:** github.com/5h4d0wn1k/enterprise-siem-platform

TECHNICAL SKILLS

- Cybersecurity:** Penetration Testing, Vulnerability Assessment, Ethical Hacking, SIEM,
- Programming:** Python, Java, C++, SQL
- Tools & Platforms:** Linux, Burp Suite, Wazuh, Wireshark, Metasploit, Nmap, Nessus, Kali Linux
- Networking:** TCP/IP, Firewalls, IDS/IPS, Packet Analysis, OWASP

CERTIFICATIONS

- Certified Ethical Hacker (CEH) – EC-Council
- Certified Network Security Practitioner (CNSP) – The SecOps Group
- HPC Data Structures and Algorithms (C++) – IAMneo

ACHIEVEMENTS & ACTIVITIES

- Achieved 36th rank in CyVIT CTF at VIT Bhopal, competed in DSA Dash, Smart India Hackathon, and Kavach (March 2023).
- Secured top 12% ranking among 100,000+ TryHackMe users by solving 200+ cybersecurity challenges, actively contributed to LeetCode and Hack The Box, and served as core member of Health O Tech Club at VIT Bhopal (July 2021).
